AMERICAN CITIZENSHIP.

OMAHA, Neb., Aug. 15.—To the Editor of The Bee: I enclose you reply to a German in today's issue stating that his son is an American born citizen, although the inquirer was born in the old country and has never naturalized or declared his intention to become an American citizen.

It is gratifying to know that Nansen's ship came through his northern voyage unharmed. It is one of the few that have weathered the stress of such an expedition and its good fortune is probably to be ascribed to the fact that we have better means of shipbuilding now than formerly.

An Indianapolis physician makes public the opinion that summer heat, especially extreme heat, is a blessing. He gives various reasons for his opinion, but omits the strongest reason, namely, that extreme summer heat is necessary to make mankind appreciate the moderate temperature of fall and spring.

Germany is said to have an eye out to the possible purchase of one or more islands of the Danish West Indies. Germany should remember that the Monroe doctrine as upheld by the United States makes no distinction as to the particular government that may seek to gain a territorial foothold on the western continent, but excludes one equally with the other.

Why don't the free silver agitators admit that it is a 50 per cent debase-ment they are after? Is it because they know that repudiation is repugnant to the mass of American people? Or is it because they are not honest enough to concede that they are dishonest?

It is gratifying to know that Nansen's ship came through his northern voyage unharmed. It is one of the few that have weathered the stress of such an expedition and its good fortune is probably to be ascribed to the fact that we have better means of shipbuilding now than formerly.

GENERAL FORMERLY, MORE OF THIS

work being now done on public account. The article remarks that the contract system has become offensive during the past few years and legislators have sought to change their plans from that either to the public-employment system or to the piece-price system.

It is gratifying to know that Nansen's ship came through his northern voyage unharmed. It is one of the few that have weathered the stress of such an expedition and its good fortune is probably to be ascribed to the fact that we have better means of shipbuilding now than formerly.

INTERNATIONAL ARBITRATION.

The scholarly address on international arbitration, delivered before the American Bar Association by Lord Russell, must be regarded as expressing the sentiments on this subject of the best people of England and so regarded it is reassuring of continued peace and friendship between the English-speaking nations.

It is gratifying to know that Nansen's ship came through his northern voyage unharmed. It is one of the few that have weathered the stress of such an expedition and its good fortune is probably to be ascribed to the fact that we have better means of shipbuilding now than formerly.

HEATING FOR THE POLE.

Minneapolis Journal: Explorer Nansen might provide for the expense of future polar investigations by proceeding without delay to organize a series of personally conducted tours.

It is gratifying to know that Nansen's ship came through his northern voyage unharmed. It is one of the few that have weathered the stress of such an expedition and its good fortune is probably to be ascribed to the fact that we have better means of shipbuilding now than formerly.

THAT'S THE QUESTION.

Why Not Live to Be One Hundred Ten Years Old. Sir Benjamin Richardson, the distinguished English physician and medical writer, that seven out of every ten found reasonable people ought to live to be years old, and would do so if they were careful of themselves.

It is gratifying to know that Nansen's ship came through his northern voyage unharmed. It is one of the few that have weathered the stress of such an expedition and its good fortune is probably to be ascribed to the fact that we have better means of shipbuilding now than formerly.

DOMESTIC IVY.

New York World: Wife-Deaf, I was blind. Husband-What a sympathetic nature you have. Boston Transcript: Fudly-They are not married. Duddy-You mean, I suppose, that she is his cook.
